

Hi-Torq Multi-Driver **6 in 1**

The Best 6 in 1 Screwdriver now has the **BEST PRICE!**

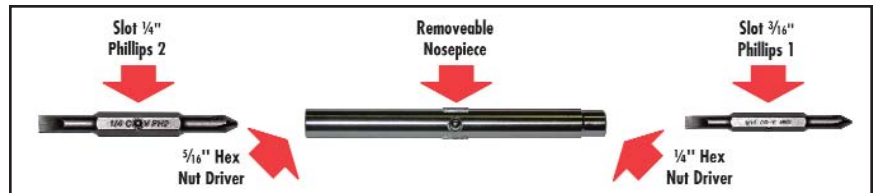

Handle gives you more **TORQUE** than other drivers!

- Engineered handle is ergonomically designed with an oversized, tapered, three-sided shape that maximizes the hand's torque force, and minimizes exertion for less hand fatigue.
- Kraton rubber grip handle coating has a tacky, non-stick surface, for a non-slip grip—even when wet or oily.
- Removeable nosepiece is chrome plated for durability and has a nut driver on each end.

- Universally sized, double-ended bits are hardened tool steel -- extra-long bits (3") are easier to handle and keep track of than the more common shorter, smaller bits.
